PROJECT

VCEMS - Vehicle Carbon Emission Monitoring System

The Carbon Emission Monitor allows passengers to estimate the emissions attributed to their travel. It is simple to use and requires only a limited amount of information from the user.
     "Motto of this project is to reduce air pollution"

SKILLS

C Programming   ●●●●○

Java programming   ●●●○○

Stress Management   ●●●●○

Team Work   ●●●●●

CONTESTS AND EVENTS

• Participated in CPL Programming Test 2021 conducted by Skillrack .

• Participated in FlipKart GRiD 4.0 - Software Development Challenge Organised by FlipKart in Unstopp.

• Participated in Error 404 Coding conducted by Karpagam College Of Engineering.

CERTIFICATIONS

SQL Data Analysis by Ram Kedem (Udemy) March,2021

Data Structure and Algorithm by Mohammed Abdul Bari(Udemy) March,2022
